## **INDEPENDENT REVIEW REPORT**

ASolid Technology Co., Ltd.

### **Introduction**

We have reviewed the consolidated financial statements of ASolid Technology Co., Ltd (the "Corporation") and its subsidiaries ( collectively, the "Group") which comprise the consolidated balance sheets as of June 30,2022 and 2021,the consolidated statements of comprehensive income for the three months end June 30,2022 and 2021 and for the six months ended June 30,2022 and 2021,the consolidated statements of changes in equity and cash flows for the six months then ended June 30,2022 and 2021,and the related notes to the consolidated financial statements, including a summary of significant accounting policies. Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Report by Securities Issuers and International Accounting Standard 34 "Interim Financial Reporting" endorsed and issued into effect by Financial Supervisory Commission of Republic of China. Our responsibility is to express a conclusion on the consolidated financial statements based on our reviews.

### **Scope of Review**

Except as explained in the following paragraph, we conducted our reviews in accordance with Statement of Auditing Standards No.65 "Review of Financial Information Performed by the Independent Auditor of the Entity". A review of consolidated financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Basis for Qualified Conclusion**

As stated in Note 10 to the consolidated financial statements, the financial statements of non-significant subsidiaries included in the consolidated financial statements were not reviewed, as of June 30,2022 and 2021, the combined assets of these subsidiaries were 0% (NT\$6,894 thousand) and 3%( NT \$51,788 thousand) of the Group's assets, respectively, and the combined liabilities of these subsidiaries were 0% (NT \$2,974 thousand ) and 15% (NT \$63,240 thousand) of the Group's liabilities ,respectively. For the three months ended June 30,2022 and 2021 and six months then ended June 30,2022 and 2021 , these subsidiaries' comprehensive income were 0%( NT \$13 thousand), (1)%( NT \$(797) thousand), 0%( NT \$28 thousand), (1)%( NT \$ (1,951) thousand), respectively ,of the Group's comprehensive income.

### **Qualified Conclusion**

Based on our reviews, except for the adjustments, if any, as might have been determined to be necessary had the financial statements of the non-significant subsidiaries and associates accounted for using the equity method as described in the preceding paragraph been reviewed, nothing has come to our attention that caused us to believe that the accompanying consolidated financial statements do not give a true and fair view of the consolidated financial position of the Group as of June 30, 2022 and 2021, its consolidated financial performance for the six months ended June 30, 2022 and 2021, and its consolidated cash flows for the three months ended June 30, 2022 and 2021,and the six months ended June 30, 2022 and 2021, in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and International Accounting Standard 34 "Interim Financial Reporting" endorsed and issued into effect by the Financial Supervisory Commission of the Republic of China.

The engagement partners on the reviews resulting in this independent auditors' review report are Su-Li Fang and Tung-Hui Yeh.

Amendments to IAS 1 "Classification of Liabilities as Current or Non-current"	January 1, 2023

Note : Unless stated otherwise, the above New IFRSs are effective for annual reporting periods beginning on or after their respective effective dates.

As of the date the consolidated financial statements were authorized for issue, the consolidated company is continuously assessing the possible impact that the application of aforementioned standards and interpretations will have on the consolidated company's financial position and financial performance and will disclose the relevant impact when the assessment is completed.

#### 4. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

##### a. Statement of Compliance

These interim consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 "Interim Financial Reporting" as endorsed and issued into effect by the FSC. Disclosure information included in these interim consolidated financial statements is less than the disclosure information required in a complete set of annual consolidated financial statements.

##### b. Basis of Preparation

The consolidated financial statements have been prepared on the historical cost basis, except for financial instruments which are measured at fair value and net defined benefit liabilities which are measured at the present value of the defined benefit obligation less the fair value of plan assets.

The fair value measurements, which are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and based on the significance of the inputs to the fair value measurement in its entirety, are described as follows:

- 1) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities;
- 2) Level 2 inputs are inputs other than quoted prices included within Level 1 that are

- observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- 3) Level 3 inputs are unobservable inputs for the asset or liability.

**c. Basis of Consolidation**

The consolidated financial statements incorporate the financial statements of the Corporation and the entities controlled by the Corporation (i.e., its subsidiaries). Income and expenses of subsidiaries acquired or disposed of during the period are included in the consolidated statement of profit or loss and other comprehensive income from the effective dates of acquisitions up to the effective dates of disposals, as appropriate. When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by the Corporation. All intra-group transactions, balances, income and expenses are eliminated in full upon consolidation. Total comprehensive income of subsidiaries is attributed to the owners of the Corporation and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Changes in the Corporation's ownership interests in subsidiaries that do not result in the Corporation losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the interest of the Corporation and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Corporation.

See Note 10, Tables 3 and Tables 4 following the Notes to Consolidated Financial Statements for detailed information on subsidiaries (including the percentage of ownership and main businesses).

**d. Other significant accounting policies**

Except for the following, the accounting policies applied in these consolidated financial statements are consistent with those applied in the consolidated financial statements for the year ended December 31, 2021.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax. Interim period income taxes are assessed on an annual basis and calculated by applying to an interim period's pre-tax income the tax rate that would be applicable to expected total annual earnings.

**5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY**

The Corporation considers the recent development of the COVID-19 in Taiwan and its economic environment implications when making its critical accounting estimates in cash flow projections, growth rate, discount rate, profitability, etc. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised if the revisions affect only that period or in the period of the revisions and future periods if the revisions affect both current and future periods. Please refer to the explanation of major sources of uncertainties in major accounting judgments, estimates and assumptions in the 2021 consolidated financial report.

**a. Notes receivable and accounts receivable**

The average credit period of sales of goods was 60 days to 90 days. No interest was charged on accounts receivable. The consolidated company adopted a policy of only dealing with entities that are rated the equivalent of investment grade or higher and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. Credit rating information is the use of other publicly available financial information and historical transaction records to rate major customers. The consolidated company continues to monitor the credit risk and the credit rating of the counterparty, and distributes the total transaction amount to different customers with qualified credit ratings. In addition, it manages the credit risk through the counterparty credit line reviewed and approved by the Risk Management Committee every year.

The consolidated company measures the loss allowance for accounts receivables at an amount Equal to lifetime expected credit losses. The expected credit losses on accounts receivables are estimated using an allowance matrix by reference to past default experience with the respective debtors and an analysis of each debtor's current financial position, adjusted for general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecasted direction of economic conditions at the reporting date. As the consolidated company's historical credit losses experience does not show significantly different loss patterns for different customer segments, the loss allowance, which is based on the past due status of receivables, is not further distinguished according to different segments of the consolidated company's customer base.

The consolidated company writes off a accounts receivable when there is information indicating that the debtor is experiencing severe financial difficulty and there is no realistic prospect of recovery, such as liquidation of the debtor. For accounts receivables that have been written off, the consolidated company continues to attempt to recover the receivables which are due. Where recoveries are made, these are recognized in profit or loss.

The consolidated company measures the allowance loss of accounts receivable according to the reserve matrix as follows :

- 1) Such capital surplus may be used to offset a deficit; in addition, when the Corporation has no deficit, such capital surplus may be distributed as cash dividends or transferred to share capital (limited to a certain percentage of the Corporation's capital surplus and once a year).

d. Retained earnings and dividend policy

Under the dividends policy as set forth in the amended Articles, where the Corporation made profit in a fiscal year, the profit shall be first utilized for paying taxes, offsetting losses of

previous years (including adjustment of the unappropriated earnings amount), setting aside as legal reserve 10% of the remaining profit until the accumulated legal capital reserve equals to the paid-in capital, setting aside or reversing a special reserve in accordance with the laws and regulations, and then any remaining profit together with the beginning balance of undistributed retained earnings shall be used by the Corporation's board of directors as the basis for proposing a distribution plan, which should be resolved in the shareholders' meeting for the distribution of dividends and bonus to shareholders. For the policies on distribution of employees' compensation and remuneration to directors and supervisors before and after amendment, refer to Note 22(g) "employees' compensation and remuneration of directors and supervisors".

The Corporation's dividend distribution policy takes into consideration the current and future investment environment, capital requirements, domestic and international competition, capital budget plans, shareholders' interests, cash dividends should be at least 10% of the total dividends distributed. However, the Corporation may adjust the principle of distribution of cash dividends and stock dividends as necessary, depending on economic conditions, industrial development and capital needs

A legal reserve shall be charged until its balance amounts to the total amount of the Corporation's paid-in share capital. A legal reserve may be used to offset deficits. If the Corporation has no deficit and the legal reserve has exceeded 25% of the Corporation's paid-in capital, the excess may be transferred to capital or distributed in cash.

The appropriations of earnings for the years ended December 31 2021 and 2020 were approved in shareholders' meeting on June 22, 2022 and August 26, 2021 and respectively, and were as follows:

### Shares

	Apr 1~Jun 30, 2022	Apr 1~Jun 30, 2021	Jan 1~Jun 30, 2022	Jan 1~Jun 30, 2021
Weighted-average number of common shares used in the computation of basic earnings per share	44,005	40,444	43,756	40,274
Effect of potentially dilutive common shares:				
Employees' compensation	699	2,878	699	2,878
Weighted-average number of common shares used in the computation of dilutive earnings per share	<u>470</u>	<u>169</u>	<u>692</u>	<u>186</u>
Weighted-average number of common shares used in the computation of basic earnings per share	<u>45,174</u>	<u>43,491</u>	<u>45,147</u>	<u>43,338</u>

If the Corporation offered to settle compensation or bonuses paid to employees in cash or shares, the Corporation assumed the entire amount of the compensation or bonuses will be settled in shares, and the resulting potential shares were included in the weighted average number of shares outstanding used in the computation of diluted earnings per share, as the effect is dilutive. Such dilutive effect of the potential shares is included in the computation of diluted earnings per share until the number of shares to be distributed to employees is resolved in the following year.

## 25. SHARE-BASED PAYMENT ARRANGEMENTS

**29. CAPITAL MANAGEMENT**

Based on the overall operating environment and the future development of the Corporation, and taking into account external competition and environmental changes and other related factors, the Corporation's capital structure is regularly reviewed by the main management, including consideration of the cost of various types of capital and related risks, in order to determine the appropriate capital structure of the Corporation. Objective to maintain the Corporation's working capital requirements, research and development costs and dividend expenses for the future period, and to ensure that the Corporation can continue to operate, give back to shareholders while taking into account the interests of other stakeholders, and maintain the best capital structure to enhance shareholder value in the long term.

The capital structure of the Corporation consists of net debts (borrowings offset by cash and cash equivalents) and equity (comprising share capital, capital surplus, retained earnings and other equities).

The Corporation is not subject to any externally imposed capital requirements.

Key management personnel of the Corporation review the capital structure on an annual basis. As part of this review, the key management personnel consider the cost of capital and the risks associated with each class of capital. Based on recommendations of the key management personnel, in order to balance the overall capital structure, the Corporation may adjust the amount of dividends paid to shareholders and the amount of new debt issued or existing debt redeemed.

Note 1: Including cash and cash equivalents, financial assets at amortized cost, notes and accounts receivable (including related parties), other receivables and refundable deposits.

Note 2: Including financial liabilities measured at amortized cost such as short-term loan, accounts payable, other payables and deposits.

b. Financial risk management objectives and policies

The Corporation's major financial instruments include equity investments, trade receivables, trade payables, borrowings and lease liabilities. The Corporation's financial management department provides services to the business unit and coordinates access to domestic and international financial markets. The risks include market risk (including foreign currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

1) Market risk

The Corporation's activities expose it primarily to the financial risks of changes in foreign currency rates (please refer below a)) and interest rates (please refer below b)). The Corporation engages in a variety of derivative financial instruments to manage the foreign currency exchange rate risks assumed.

The Corporation's approach to the risk of market risks in financial instruments and the way in which they are managed and measured has not changed.

a) Foreign currency risk

The Corporation had foreign currency sales and purchases, which exposed the Corporation to foreign currency risk. About 100% of the Corporation's sales are not denominated in functional currencies, while about 100% of the cost amounts are not denominated in functional currencies.

The book value of monetary assets and monetary liabilities denominated in non-functional currencies at the balance sheet date, as well as the book value of derivatives with exchange rate risk, please refer to Note 33.

Sensitivity analysis

The Corporation was mainly exposed to the US dollar.

The following table details the Corporation's sensitivity to a 1% increase and decrease in the New Taiwan dollar (the functional currency) against the relevant foreign currencies. The sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates is 1%. The sensitivity analysis included only

outstanding foreign currency denominated monetary items and adjusts its translation at the end of the reporting period for a 1% change in foreign currency rates. A positive number below indicates a decrease in pre-tax profit and other equity associated with the New Taiwan dollar strengthens 1% against the relevant currency. For a 1% weakening of the New Taiwan dollar against the relevant currency, there would be an equal and opposite impact on pre-tax profit and other equity and the balances below would be negative.

Impact of USD	Impact of USD	
	Jan 1~Jun 30, 2022 \$ 202(i)	Jan 1~ Jun 30, 2021 \$ 212(i)

(i). Mainly derived from the Corporation's balance sheet date is still in circulation and no cash flow risk aversion in U.S. dollar-denominated bank savings, receivables, payables and loan.

#### b) Interest rate risk

As the Corporation borrows funds at both fixed and floating rates, interest rate risk arises. The Corporation manages interest rate risk by maintaining an appropriate fixed and floating interest rate portfolio. The Corporation regularly evaluates risk aversion activities to bring them into line with interest rate perspectives and established risk appetites to ensure the most cost-effective risk aversion strategies are adopted.

The carrying amount of the Corporation's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	June 30, 2022	December 31, 2021	June 30, 2021
Fair value interest rate risk			
— Financial assets	\$ 694,712	\$ 694,707	\$ 5,103
Cash flow interest rate risk			
— Financial assets	922,405	729,307	967,878
— Financial liabilities	88,500	-	124,650

#### Sensitivity analysis

The following sensitivity analysis is based on the risk of interest rate risk at the balance sheet date for derivatives and non-derivatives. For floating rate assets, the analysis is based on the assumption that the amount of assets in circulation on the balance sheet day is in circulation during the reporting period. The rate of change used to report interest rates to key management within the Corporation increases or decreases by 1% per year, which also represents management's assessment of the reasonable range of possible changes in interest rates.

If increases or decreases rates had been 1% higher and all other variables were held constant, the Corporation's pre-tax profit for the ended June 30, 2022 and 2021 would increase or decrease by \$4,170 thousand and \$4,216 thousand, respectively. The main reason is the net risk of the Corporation's interest-bearing bank deposits and loan at variable interest rates.

#### 2) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations, resulting in a financial loss to the Corporation. As at the end of the reporting period, the Corporation's maximum exposure to credit risk, which would cause a financial loss to the Corporation due to a failure of counterparties to discharge an obligation and financial guarantees provided by the Corporation, comes from the carrying amounts of the respective recognized financial assets as stated in the parent company only balance sheets.

The corporation's credit risk is mainly concentrated in the corporation's top five customers, as of June 30, 2022 and December 31, 2021 and June 30, 2021, the total accounts receivable from the aforementioned customer's ratio of 57%, 65% and 68%, respectively.

### 3) Liquidity risk

The Corporation manages liquidity risk by monitoring and maintaining a level of cash and cash equivalents deemed adequate to finance the Corporation's operations and mitigate the effects of fluctuations in cash flows. In addition, management monitors the utilization of bank borrowings and ensures compliance with loan covenants.

The Corporation relies on bank borrowings as a significant source of liquidity. June 30, 2022 and December 31, 2021 and June 30, 2021, the Corporation's available unutilized bank loan facilities please refer below b):

#### a) Liquidity and interest risk rate table for non-derivative financial liabilities

The analysis of the remaining contractual maturity of non-derivative financial liabilities is prepared based on the earliest possible date of repayment by the combined company, based on the undiscounted cash flows of financial liabilities (including principal and estimated interest). The bank borrowings that the consolidated company may be required to repay immediately are within the earliest period in the table below, regardless of the probability that the bank will immediately execute the right; the maturity analysis of other non-derivative financial liabilities is prepared according to the agreed repayment date.
